

# **Mini Project 3**

## **WEB PROGRAMMING SPRING 2020**

**Due date: 04/23/2020**

### **Project Requirements**

This is your final Mini Project. Please look at the following requirements.

- 1) Finish all parts promised on Mini Project 1.
- 2) Add a database to your mini project. This must be completed only by codd. No local databases must be used. One per team can create the database. All the team members don't have to create database.
- 3) You must perform CRUD operations (1 operation each from create, read, update, delete).
- 4) Make it look as professional as possible.
- 5) Have all the files on github.
- 6) Youtube Video – One member per team can make the youtube video. The youtube link must be working from your mini project 3 codd link. Please talk about the mysql part, what operations you added and where they are located.
- 7) There will be in class presentation for your final mini project. Last week of April will be dedicated for your final mini project presentations.

### **Submission Requirements**

- 1) You must submit the codd server link for mini project 3 and all the code used for mini project 3 on icollege.
- 2) If the link doesn't work, you get an automatic '0'.
- 3) All the members of the team must submit the link on icollege. One member of the team must upload the code.
- 4) If a team member doesn't upload a link, they will lose points.
