Mini Project 2
WEB PROGRAMMING SPRING 2020
Due date: 03/15/2020

Project Requirements

All students will be improving and updating the Mini-Project 1. Please look at the following requirements.

1) You must have significant work updated from Project 1.
2) HTML pages must be browser compatible and size compatible. If you decrease the size of the browser, the contents inside the browser must fit with the size.
3) Create a login page with using Session variables and once you login, the next page must display Welcome $Session_name (Username) somewhere on the page. Make it look professional.
4) Use cookies on your website.
5) Using Javascript, display the number of days left until the end of this semester on the page after login.
6) Since, Javascript basics are finished, you are free to implement anything that involves Javascript.
7) There is no in-class presentation for this project.
8) Please make a youtube video and like your project 1 and put the link on your mini project 2. Explain in the youtube video where session variables, cookies and javascript were used.

Submission Requirements

1) You must submit the codd server link for mini project 2 and all the code used for mini project 2 on icollege.
2) If the link doesn't work, you get an automatic '0'
3) All the members of the team must submit the link on icollege. One member of the team must upload the code.
